Company Profile

We are the leading company of design and production for synthetic thatch, synthetic bamboo, and synthetic mat, etc. In China. We can make different sizes, different colors, and different styles for thatches, bamboos and mats since 2001s. They are 100% simulation. Some of them can be fireproof and waterproof. We always develop new models according to our customers' requirements. To be a leading high technology enterprise, our company commit in research and exploitation of synthetic thatch and bamboo technology. Leading by market demanding, we chase for meeting our clients' needs unceasingly and commit ourselves to product-oriented as well as market-oriented, so as to provide our client with super-value product and favorable aftersales service. Welcome all customers from the world to visit our company.

1. Industry: Environmental Building materials, garden landscape design, landscape architecture, landscape works, etc.
2. Our product: They are made from PE (Polyethylene), PVC (PolyVinyl Chloride), and ABS (Acrylonitrile Butadiene Styrene plastic). It meets the environmental-friendly requirements. It is a new landscape ideal material for roof decoration.

Company Honours

Thatch List

Installation Accessories

For R-1-1 and R-1-2 model, they are similar, but R-1-1 doesn't need rail/slot, it can install on the existing roof, such as full wood panels, wood shingles, steel board, plastic board, cement roof, or any other existing roof, you can't see the thatches underneath the roof. R-1-2 may need rail, but you can use wood sticks or battens instead of rails. Our rail is 1m or 3m long. R-1-2 can be installed on the wood rafters or battens structure roof, then you can see the back side of thatches when you stand underneath the roof. For R-1-3 model, it can be installed in any kinds of roofs.

R-1-2, leaves are to be screwed onto the structure beams using rails

R-1-1, leaves are to be nailed or screwed directly onto an existing roof finished paneling

The windproof clips are used for strong wind area, each leaf uses 2 clips. For the top ridge, hip/valley/gutter and round top cap, you can make them by our standard thatches, you can also buy from us.
